

iToilet AAL-2015-1-084

Surprisingly, there is one very common appliance which we use several times a day which has not changed since its invention: our toilet

ICT-enhanced Toilet Supporting Active Life

iToilet will bring benefit to:

- primary end-users' dignity and independence: enhancing body stability on the toilet (adjustable height, hands free for handles), supporting sitting down and standing up process (dynamic adaptation of tilt and height), and increased safety via emergency detection.
- secondary users/care persons: the burden when assisting the end user will be reduced by support by the toilet itself.
- care institutions: not only the care service offered to the clients will be enhanced but also health and well-being of the employees

Project start: April 1, 2016

Project duration: 30 months

Coordinator: TU Wien, IGW

Total budget: 1.5 MEUR (tbc)

Web: www.itoilet-project.eu
